AMEERA ALHAJRI

Lawrence, KS | (785) 840-4822 | ammhalhajri@gmail.com

EDUCATION

University of Kansas, Lawrence, KS May 2026

- *BS in Chemical Engineering, Honors; Environmental Emphasis*
- *Minor in Classical Antiquity*

TECHNICAL SKILLS

- Computer Languages*: Python, R, LabVIEW, MatLab*
- Tools*: AspenPLUS, Aspen HYSYS, ArcGIS, HEC-HMS, GC-MS, LF-NMR, Microsoft Office*
- Skills*: Laboratory techniques pertaining to biological and chemical sciences. Pharmaceutics regarding scientific applications.*
- Languages: *Fluent in Arabic and English*

WORK EXPERIENCE

Watkins Health Center, *Health Navigator*, Lawrence, KS Jan. 2024 – May 2025

- Streamlined patient intake and communication processes by coordinating with healthcare providers to ensure efficient workflow and timely resolution of patient requests.
- Supported daily clinic operations by maintaining confidential records, managing administrative tasks, and ensuring compliance with organizational policies and procedures.

PROJECTS & LEADERSHIP EXPERIENCE

Unmistakable Lawrence Events Grant Jan. 2025

- Secured funding for a collaborative Park(ing) Day proposal in Lawrence, Kansas. Integrated sustainability, design, and user-focused innovation to reflect on prior work and enhance public space accessibility and aesthetic for future implementation.

University of Kansas Service-Learning Grant Jan. 2025

- Awarded for community engagement and service learning through Lawrence Park(ing) Day. Funds supported converting vehicle parking into inclusive, pedestrian-centered public space experiences.

Wonderful Institute for Sustainable Engineering, *Undergraduate Researcher* June 2024 – May 2025

- Conducted research on a Pfizer-sponsored project focused on sustainable catalysis in pharmaceutical applications.
- Utilized GC-MS and LF-NMR to quantify solvent-catalyst interactions using surface poisoning techniques.
- Interpreted data sets using statistical analysis to assess surface interactions and reaction kinetics.
- Presented findings at the Wonderful Institute of Sustainable Engineering, highlighting the role of sustainable ingredient behavior in clean chemistry initiatives.

PRESENTATION(S)

"*Quantifying THF and Water Adsorption on Pd/C Surfaces Using Surface Poisoning and LF-NMR*" Oral Presentation – University of Kansas, School of Engineering --- Wonderful Institute of Sustainable Engineering Undergraduate Research Symposium. Lawrence, KS, 2025

PUBLICATION(S)

Allgeier, A., Kumar, L., **Alhajri, A.** et al. (2025). 'Adsorption Studies of Pharmaceutical Feed Impurities on Pd/C Catalysts Fail to Predict Activity in Liquid Phase Hydrogenation' *Applied Catalysis A: General.* APCATA-D-25-01213R1

PROFESSIONAL AFFILIATION(S)

American Institute of Chemical Engineers (AIChE), *Member* 2022 – Present

- Professional organization dedicated to advancing the chemical engineering profession through technical development, networking, and professional growth. Participated in chapter activities that promoted collaboration among students, faculty, and industry professionals while fostering leadership and career readiness in chemical engineering.

CERTIFICATION(S)

Safety and Chemical Engineering Education (SAChE) Safety Certificates

- Level 1 – Chemical Process Safety
- Level 2 – Reactive Chemicals
