Profile

A highly skilled and compassionate Pedodontist with a Master's degree in Pediatric Dentistry and extensive experience in treating children, including those with special needs, under local and general anesthesia. Adept at providing preventive, diagnostic, and therapeutic care with an emphasis on patient comfort and safety. Proven expertise in infection control across multiple healthcare settings, including leading teams, implementing protocols, and reducing healthcare-associated infections (HAIs). Strong leader and educator, with the ability to train healthcare staff in best practices while maintaining compliance with healthcare regulations. Currently seeking a position to leverage expertise in pediatric dentistry and infection control to make a significant impact in a reputable healthcare organization.
