ABOUT MYSELF

I am a dedicated Dental Hygiene graduate from Aga Khan University with a strong foundation in clinical excellence and community health advocacy. Throughout my training and professional experience in Karachi, I have developed comprehensive skills in periodontal assessment, scaling and root planing, preventive care applications, and patient education. I take pride in my ability to connect with diverse patients—from those with complex periodontal conditions to palliative care patients and smokeless tobacco users—using motivational interviewing and culturally sensitive communication. My passion extends beyond the clinic walls; I have actively participated in community outreach dental camps, school screening programs, and tobacco cessation initiatives targeting high-risk populations. I am committed to evidence-based practice, continuous learning, and delivering patient-centered care that empowers individuals to take control of their oral health. With strong interpersonal skills, attention to detail, and a genuine empathy for others, I strive to make every patient interaction meaningful and every treatment plan truly personalized.

EDUCATION & TRAINING

01/02/2023 - 17/01/2026 - KARACHI, PAKISTAN

ASSOCIATE OF SCIENCE IN DENTAL HYGIENE - THE AGA KHAN UNIVERSITY

Main Subjects Covered

The Associate of Science in Dental Hygiene program at Aga Khan University provided comprehensive theoretical foundation through core coursework in Periodontology, Dental Anatomy, Oral Medicine and Pathology, and Dental Radiology. Biomedical sciences including Anatomy and Physiology, Pharmacology, and Microbiology equipped me with understanding of systemic health connections to oral care. Professional development subjects such as Dental Hygiene Theory, Community Health Leadership, Dental Materials, and Developmental Psychology prepared me for evidence-based, patient-centered practice. The curriculum also emphasized research methodology through Quantitative Reasoning, enabling critical evaluation of scientific literature and application of findings to clinical care

Clinical and Professional Skills Covered

Clinical training developed proficiency in comprehensive oral assessments (intraoral/extraoral examinations, periodontal charting, vital signs measurement) and radiographic techniques including interpretation and evaluation. I am skilled in scaling and root planing using both hand instruments and ultrasonic devices,

preventive treatments (fluoride varnishes, sealants), impression taking with alginate and putty materials, and instrument sterilization following strict infection control protocols. Patient management competencies include individualized care planning, motivational interviewing, tobacco cessation counseling using the 5A's framework, diet analysis, and dental emergency management. I am experienced in treating diverse populations including palliative patients, smokeless tobacco users, and those with complex periodontal conditions. Additional skills include patient education, cultural competency, clinical documentation using software like Sideaxis, and interprofessional collaboration within multidisciplinary teams.

Field(s) of study:Dental studies | Final grade: 3.19/4 | Level in EQF: 6 | National classification: 5 | Type of credits: SCH | Number of credits: 78 | Thesis: Myths in dental scaling pre and post intervention questioners a quasi experimental approach | Website: www.aku.edu

01/05/2014 - 01/12/2016 - LAHORE, PAKISTAN

HIGHER SECONDARY SCHOOL CERTIFICATE - GOVERNMENT COLLEGE UNIVERSITY LAHORE , PAKISTAN

Principal subjects / modules:
Biology: Cell biology, genetics, human anatomy & physiology, microbiology, plant & animal biology
Chemistry: Organic, inorganic, physical chemistry, lab experiments
Physics: Mechanics, optics, thermodynamics, electricity & magnetism, lab experiments
English: Reading comprehension, essay writing, scientific communication
Islamic Studies / Ethics (1st year)
Pakistan Studies (2nd year) Key
skills acquired:
Analytical and scientific reasoning
Laboratory skills (microscopy, titration, experiments)
Observation, documentation, and data analysis
Time management and study skills
Communication skills (report writing, scientific explanation)
Ethical understanding in biological & healthcare contexts

Field(s) of study:Health not further defined | Final grade: 78% | Level in EQF: 5 | National classification: 5 | Type of credits: Hours | Number of credits: 1700 hours | Website: www.gcu.edu.pk

01/01/2012 - 01/01/2014 - BAJAUR MALAKAND, PAKISTAN

SECONDARY SCHOOL CERTIFICATE - MAMUND PUBLIC HIGH SCHOOL

SSC (Secondary School Certificate) – Science Group:
Completed secondary education in the Science group under the Board of Intermediate and Secondary Education, Pakistan. The curriculum covered Physics, Chemistry, Biology, Mathematics, English, Urdu, Islamic Studies, and Pakistan Studies, providing a solid foundation in scientific concepts and quantitative reasoning. Developed key competencies including analytical and problem-solving skills, basic laboratory awareness, observation and data interpretation, effective communication, and disciplined study practices essential for further studies in health and science fields.

Field(s) of study:Health not further defined | Final grade: 89.9% | Level in EQF: 3 | National classification: 4 | Type of credits: 1700 hours | Number of credits: Annual | Website: www.bisemalakand.pk

WORK EXPERIENCE

01/06/2024 - CURRENT - KARACHI, PAKISTAN

MAIN ACTIVITIES AND RESPONSIBILITIES

Dental Hygiene Student Clinician
Aga Khan University Hospital, Karachi
Dental Hygiene intern 1/17/2026 ongoing

- Clinical Assessment and Diagnosis
- Conduct comprehensive intraoral and extraoral examinations to evaluate oral health conditions.
- Perform detailed periodontal assessments including probing depth, clinical attachment level, furcationinvolvement, tooth mobility, and bleeding on probing.
- Record and monitor vital signs (blood pressure, pulse, respiration) to ensure safe dental treatment.
- Review and analyze patient medical histories and classify patients using ASA physical status.
- Capture and interpret dental radiographs for diagnosis of caries, periodontal bone loss, and oralpathologies.
- Maintain accurate clinical documentation and periodontal charting.
- Preventive and Periodontal Treatment
- Perform scaling and root planing using ultrasonic and hand instruments.
- Deliver nonsurgical periodontal therapy (NSPT) for gingivitis and periodontitis.
- Apply preventive treatments including fluoride varnish, fluoride gel, and dental sealants.
- Take dental impressions using alginate and putty materials for diagnostic models.
- Assist dentists during restorative and crown preparation procedures.
- Special Patient Care
- Provide oral care education to head and neck oncology patients managing xerostomia, mucositis, andradiation caries risk.
- Deliver oral hygiene support for palliative care patients to improve comfort and dignity.
- Educate caregivers on daily oral care for dependent and bedridden patients.
- Support pediatric oncology patients by managing oral complications during chemotherapy.
- Patient Education and Behavior Change
- Provide individualized oral hygiene instruction using patient-centered communication.
- Deliver tobacco cessation counseling using the evidence-based 5A's approach.
- Use motivational interviewing techniques to support behavior change.
- Conduct diet analysis and provide nutrition counseling for oral health improvement.
- Develop personalized preventive care plans based on risk assessment.• Community Outreach and Public Health
- Participate in community dental camps serving underserved populations in Karachi.
- Conduct school oral health screening programs for children.
- Deliver oral health promotion workshops and preventive education sessions.
- Interprofessional Collaboration
- Work closely with dentists, dental specialists, and multidisciplinary healthcare teams.
- Coordinate oral care with head and neck oncology and pediatric oncology departments.
- Contribute to integrated patient care planning with healthcare professionals.
- Use clinical software (Sideaxis) for patient scheduling, documentation, and record management.
- Key Achievements / Value Added
- Improved patient awareness through targeted oral health education and counseling.
- Supported preventive care programs for high-risk patients including tobacco users and oncology patients.

- Strengthened community oral health outreach initiatives through school and community screeningprograms.
- Clinical services of dental hygiene to patients
- Worked as dental Hygienist

01/01/2018 - 01/01/2022 - KARACHI, PAKISTAN

SECONDARY SCHOOL TEACHER THE REAL EDUCATOR ENGLISH GRAMMAR SCHOOL

Work Experience
Secondary School Teacher
The Real Educator English Grammar School – Karachi, Pakistan
January 2018 – January 2022
Teaching and Classroom Instruction

- Taught English Grammar and science subjects including Biology, Chemistry, and Physics tosecondary-level students.
- Explained complex scientific concepts using simple and practical teaching methods.
- Prepared lesson plans, classroom activities, and assessments aligned with curriculum standards.
- Supported students in improving academic performance and examination preparation.

Student Development and Mentorship

- Guided students from diverse educational and socioeconomic backgrounds.
- Encouraged critical thinking, curiosity, and independent learning.
- Provided additional academic support to struggling students to improve learning outcomes.
- Promoted positive classroom discipline and effective study habits.

Communication and Educational Skills

- Developed strong communication and presentation skills through daily teaching activities.
- Simplified difficult topics to improve student understanding and engagement.
- Maintained constructive communication with students and school administration.

Digital Education and Educational Outreach

- Created and manage an educational YouTube channel (Deep Edu Inn) with more than 1.12K subscribers.
- Record and upload free lectures to support secondary school students who cannot afford private tuition.
- Use digital platforms to expand access to education and promote knowledge sharing.
- Provide free online academic support as a community service initiative.

Key Achievements / Value Added

- Helped students improve understanding of English grammar and science subjects.
- Expanded learning opportunities through free online educational content.
- Promoted accessible education for underserved students through digital teaching initiatives.

Certificate of Completion (Academic English - Academic Style):

Certificate of Completion (Critical Thinking Fundamentals):

HOBBIES AND INTERESTS

Cooking Cooking is one of the hobbies that I truly enjoy in my life. Whenever I have free time, I like to cook for myself, for my colleagues, and for my friends. It gives me great happiness to prepare food and share it with the people around me. I especially love cooking for my mother and father because it makes me feel close to them and shows my care and respect. Whenever I visit my home during vacations, the kitchen almost becomes my responsibility. The spoon and the knife are always in my hands, and I take full control of the kitchen with excitement and confidence. I enjoy preparing beautiful and delicious dishes for my family.

Before cooking, I carefully gather all the ingredients such as fresh vegetables, oil, meat, spices, garlic, and other necessary items. I like to arrange everything neatly and prepare the food step by step. In my village, I sometimes cook in a traditional way by lighting fire with wood and preparing simple organic dishes. The natural taste of food cooked on a wood fire is very special. Even when I stay in the hostel, I still try to cook whenever I get the chance because it makes me feel relaxed and happy.

Cooking is not limited to home or hostel for me. Even during tours or trips, I like to carry some ingredients with me. Sometimes my friends and I cook near a river, beside water, or under the shade of a tree. The environment becomes peaceful and joyful. We prepare simple dishes together, taste the food, laugh, and enjoy the moment. Cooking in nature with friends creates beautiful memories. For me, cooking is not just about food. It is about happiness. It is about sharing. It is about love. here the description...

PERSONAL BACKGROUND AND MOTIVATION FOR RELOCATION

CURRENT
Personal Background and Motivation for Relocation To whom it may concerns

An educated professional originating from Bajaur District, a remote tribal region located near the Durand Line, respectfully presents this request. This region has experienced prolonged insecurity and instability for many years. Civilians, students, teachers, and professionals are frequently affected. Public institutions such as schools, hospitals, and community facilities have at times been targeted. As a result, access to education, employment, and professional development remains extremely difficult.

Location reference:
https://maps.google.com/?q=Bajaur+District+Khyber+Pakhtunkhwa+Pakistan

During major military operations in the region, the family home was completely destroyed and nearly all means of livelihood and shelter were lost. For a period of time, no safe housing was available and the family was left under the open sky before eventually being displaced to refugee camps. Several years were spent living in displacement camps where life was marked by uncertainty, limited resources, and serious disruption to education and stability.

Despite these hardships, education and professional training were pursued with determination and resilience. Strong values of discipline, integrity, adaptability, and commitment to service were developed through both academic efforts and life experience in a challenging environment.

However, the ongoing insecurity and instability in the region continue to pose serious risks to personal safety, professional development, and family stability. For this reason, international opportunities with visa sponsorship are respectfully requested so that relocation to a safer and stable environment may be possible.

Participation would be welcomed in a variety of opportunities commonly available in Europe for non-EU candidates, including:

Employment in public institutions, private organizations, or international programs

Positions in private dental clinics, dental centers, or oral healthcare practices

Dental hygienist roles or related oral health professions

Hospital or healthcare support positions

Traineeships, internships, or clinical training opportunities

Volunteer and humanitarian programs

Research or educational assistant roles

Vocational training or professional development programs

Community health and social service initiatives

Apprenticeship or skills-development programs

Commitment, adaptability, a strong work ethic, and a willingness to learn and contribute positively in any professional or educational environment would be offered to the organization or clinic providing such an opportunity.

Providing such an opportunity would not only support a motivated and resilient educated individual but would also represent a meaningful humanitarian step for someone who has continued to pursue education and professional development despite extreme adversity. The goal is to rebuild a safe and dignified life for parents, children, and family members, while contributing positively to society through knowledge, service, and professional dedication.
