DR. FATIMA NIAZ

DENTAL SURGEON

PROFILE

A dedicated Dental Surgeon with strong clinical experience from working in both private clinics and a government teaching hospital. Completed internship and training at Ayub Medical Complex, gaining wide exposure to different dental cases and treatments. Skilled in root canal therapy, fillings, crowns, veneers, dentures, teeth whitening, and other restorative and cosmetic procedures. Experienced in giving local anesthesia, handling dental emergencies, and providing patients with clear counselling and aftercare. Committed to high standards of sterilization, careful treatment, and patient comfort in every procedure.

WORK EXPERIENCE

Ayub Medical Complex (Government Teaching Hospital) **June 2022 – 2023**

Dental Surgeon (Internship)

- Delivered full-spectrum dental services including restorative procedures (composite fillings, crowns, veneers), endodontic treatments (pulpotomy, pulpectomy, root canal therapy), and prosthodontic care (impressions, complete and partial dentures).
- Assisted and independently managed oral surgery cases, including local anesthesia administration (infiltration, block, intraligamental, intrapulpal) and post-operative complication management.
- Performed esthetic dentistry procedures such as teeth bleaching, whitening, and cosmetic restorations.
- Gained hands-on experience in crown preparation and cutting (porcelain, zirconium, porcelain-fused-to-metal).
- Supported orthodontic cases through radiographic evaluation and cephalometric analysis for treatment planning.
- Maintained strict infection control and sterilization protocols, ensuring patient safety and compliance with clinical standards.
- Provided patient counselling, post-operative care instructions, and follow-ups to support recovery and patient satisfaction.

Smile Orthodontic & Dental Clinic **May 2021 – Present**

Dentist

- Provide Provide comprehensive dental care including root canal treatments (RCT), direct/indirect pulp capping, pulpotomy, pulpectomy, composite fillings, crowns (porcelain, porcelain-fused-to-metal, zirconium), veneers, and dental lenses.
- Perform tooth bleaching and whitening, crown adjustments and cutting (porcelain, PFM, zirconium), and management of aesthetic restorative cases.
- Skilled in local anesthesia techniques (infiltration, block, intraligamental, intrapulpal) ensuring patient comfort and pain-free procedures.
- Carry out prosthodontic procedures including impression taking and material mixing (GIC, Zinc Oxide Eugenol, zinc sulphate, calcium packing) and fabrication of complete and partial dentures.
- Conduct orthodontic consultations and perform radiographic and lateral cephalometric analysis for treatment planning.
- Manage dental emergencies such as dry socket and post-operative complications with appropriate treatment and follow-up.
- Oversee clinical operations including sterilization, instrument sharpening, dental handpiece maintenance, dental unit troubleshooting, and efficient management of dental materials.
- Counsel patients effectively, ensuring they are well-informed pre- and post-operatively, and maintain accurate data entry and treatment records.

Ayub Medical College **2022 – 2023**

Lecturer

- Delivered lectures and practical sessions on Physiology, Anatomy, Biochemistry, and Microbiology for nursing students.
- Designed and administered student assessments, quizzes, and examinations, providing constructive feedback.
- Supported students in academic challenges, collaborating with academic advisors to enhance learning outcomes.
