Dr. Ali Asgar Shakir

EMPLOYMENT PROFILE:

Dentist – Allesley Pharmacy – Coventry UK

February 2023 to January 2025:

- Implemented comprehensive patient care protocols, encompassing thorough examinations with health history assessments and radiographic interpretations, culminating in precise diagnoses and tailored treatment strategies; concurrently executing a diverse array of dental interventions, including anesthesia administration, endodontic therapies, and exodontia procedures, while prioritizing patient comfort and anxiety management.
- Conducted a multifaceted approach to patient education and preventive care, elucidating proper oral hygiene techniques, post-operative management, and prophylactic measures to both patients and their families; simultaneously maintained meticulous patient records and prescription documentation in adherence to regulatory standards, fostering enduring patient relationships and cultivating a loyal clientele.
- Spearheaded daily clinical operations with a dual focus on maximizing productivity and delivering patient-centric dental services, effectively balancing administrative responsibilities with the provision of high-quality, personalized oral healthcare, thereby ensuring optimal patient outcomes and practice efficiency.

Dentist - Apple Dental Clinic - India

October 2020 to October 2022:

- Executed in-depth perioperative care, including suture removal post-complex treatments, attentive assistance during intricate oral procedures, and detailed patient guidance encompassing preoperative preparation, postoperative management, and prescription formulation.
- Established a wide range of preventive and restorative dental procedures, such as applying fluoride treatments and dental sealants, administering tooth whitening regimens, performing root canal therapies, and conducting both surgical and non-surgical tooth extractions with minimal tissue trauma.
- Competent thorough oral examinations to assess patients' dental health status, executed precise scaling procedures utilizing powered instruments, and fostered a compassionate, empathetic patient interaction approach to cultivate positive dental experiences and promote optimal long-term oral health outcomes and patient relation.
